

Required Updates & Improvements

Search Form

- Date, time, and duration are already selected before choosing a room. When a room is selected, these fields should remain pre-filled. There is no need for the user to select them again.

Customizable Labels & Texts

- We should have the option to customize all system messages, labels, and texts throughout the platform.

Example: Allow admin to edit text for form fields, buttons, and alerts.

Booking Details Page

- Remove the Cancel Booking button. Cancellations should only be handled via phone or email.
- The Request Modification button should remain available.

OTP Notification Template

We also need an updateable OTP notification email template similar to other one

On-Site Payment Handling

- For an onsite payment booking If the payment status is pending and the booking is canceled for any reason, the payment status should also be automatically canceled.

Payment Management

- Admin should be able to update/change the payment status directly from the booking page.

Additional Payment Options

The following payment methods should be supported:

- PayPal
- On-Site Payment
- Stripe
- WooPayments
- Payment Integration Setup

When setting up the plugin, the system should provide a clear option to integrate the selected payment methods with proper configuration steps.

External links for detailed room page

When user will click on View “Detail button “ it will take to that link for each room

Instead of opening in popup

Other

I cannot delete any booking

I cannot add a booking from admin side

Please complete the form to see pricing details

For email verification

How can we confirm this is same user I guess we should verify email for each session atleast

At the moment i open the site in private window and write my email and it says your email is already varified
